

Nadeem Ahmed

DevOps Engineer

OBJECTIVE

Experienced in AWS, Kubernetes, and CI/CD automation. Strong background in infrastructure security, monitoring, and cloud optimization. Skilled in containerization and streamlining deployments for high availability.

Certifications

1. AWS Certified Solutions Architect Associate
2. Complete Python Bootcamp
3. DevSecOps Essentials
4. Complete Guide to Elasticsearch
5. Kubernetes for Absolute Beginners
6. Ansible for the Absolute Beginner
7. DevOps Essentials
8. Docker for Absolute Beginners
9. Git Complete
10. Data Visualization with Kibana

Skills

- ❖ Linux
- ❖ Shell Scripting
- ❖ Python scripting
- ❖ Tomcat
- ❖ Git
- ❖ GitHub Actions
- ❖ Jenkins
- ❖ ArgoCD
- ❖ Docker
- ❖ Kubernetes
- ❖ EKS
- ❖ EFK
- ❖ Kloudfuse
- ❖ SOC2
- ❖ AWS Inspector
- ❖ Vanta
- ❖ AWS - EC2, ECS, S3, RDS, Lambda, Step Functions, SNS, Route

EXPERIENCE

05/2021 - CURRENT

Eltropy - DevOps Engineer

SOC2 Compliance & Security: SOC2 compliance initiatives by implementing comprehensive vulnerability patching strategies across AWS services (Lambda, EC2, S3), ensuring adherence to security standards and best practices

Vulnerability Management: Led vulnerability remediation efforts using AWS Inspector to identify and patch security findings in EC2 instances, conducting thorough testing before deploying updated AMIs to production environments

Cloud Security Implementation: Implemented Lambda security controls according to industry standards and enforced S3 bucket security policies including encryption, versioning, and access controls to maintain data integrity

Release Management: Managed end-to-end deployment activities by coordinating with QE, Development, Engineering, and Analytics teams, creating comprehensive checklists and implementing rigorous testing protocols

CI/CD Pipeline Management: Enhanced deployment workflows using Jenkins, Argo CD, and GitHub Actions to improve reliability and reduce release cycles

Containerization: Migrated applications from EC2 instances to Kubernetes clusters, resulting in improved scalability and resource utilization

Monitoring & Observability: Implemented monitoring and alerting solutions using industry-standard tools to provide real-time visibility into system performance and reliability.

Data Engineering Support: Optimized Data Engineering infrastructure, managing workflows with AWS Lambda, AWS Glue, and Step Functions

Incident Management: Implemented CloudWatch alerts integrated with Slack for proactive incident management and response

Infrastructure Management: Established and maintained high-availability AWS infrastructure following industry best practices and security standards

System Administration: Managed critical systems including SiteVPN, SFTP, SSO, and SSL certificate management to ensure secure connectivity

Server Maintenance: Conducted routine Linux server maintenance and patching to maintain stable and secure operations

Automation: Implemented recurring CloudWatch alarms integrated with Step Functions, SNS, and Lambda for automated alerting

Cost Optimization: Automated RDS start/stop mechanisms in production for optimized performance and cost efficiency

Access Management: Administered IAM roles, users, policies, and permissions following Least Privilege Principle (LPP)

53, IAM, CloudWatch,
CloudTrail.

Education

Visvesvaraya Technological
University (VTU)

Bengaluru

01/2019 - 05/2021

Hewlett Packard Enterprise - Server Engineer

- Performed root cause analysis and troubleshooting for enterprise infrastructure including hardware, networking, and initial setup of Windows Server, RHEL, and VMware ESXi environments
- Specialized in HPE ProLiant servers (ML, DL, XL, and Blade servers) configuration and maintenance
- Automated update processes and recommended best practices for maintaining robust node clusters
- Implemented optimal data storage solutions using RAID techniques based on available hardware specifications
- Conducted comprehensive testing and replication to resolve reported issues efficiently

07/2015 - 01/2016

STS Infotechnologies (Third-party vendor for CISCO) - IT Analyst

- Provided technical support for Cisco employees with configuration and setup of tools including Cisco Webex, Jabber, and mobility applications
 - Resolved technical issues remotely and documented incident resolutions
 - Configured Cisco mobility setups and networking solutions
-
