7+	AWS	SOC2	EKS
Years in DevOps / SRE	Certified Solutions Architect	Compliance programme owner	EC2 to Kubernetes migration

PROFESSIONAL SUMMARY

DevOps / SRE Engineer with 7+ years of experience running secure, highly available AWS infrastructure. Hands-on with **Kubernetes (EKS), Terraform, CI/CD (Jenkins, Argo CD, GitHub Actions) and SOC2 compliance**. AWS Certified Solutions Architect – Associate. Proven record of improving deployment reliability, cloud security posture and cost efficiency. Seeking DevOps, SRE, Cloud or Platform Engineer roles in the UAE.

CORE SKILLS

Cloud (AWS)	EC2, EKS, ECS, S3, RDS, Lambda, Glue, Step Functions, VPC, VPN, Route 53, IAM, CloudWatch, CloudTrail, Inspector, ACM, SNS
Containers & K8s	Kubernetes (EKS), Docker, Helm, HPA, Ingress controllers
CI/CD & IaC	Jenkins, GitHub Actions, Argo CD, Terraform, Ansible, Git, GitHub
Scripting	Python, Shell scripting
Monitoring	Grafana, PromQL, CloudWatch, EFK / Kibana, Slack alert integrations
Security & Compliance	SOC2, Vanta, DevSecOps, vulnerability management, IAM (least privilege), SSO/SAML, SSL/TLS, firewalls, DDoS protection
Systems & Networking	Linux (RHEL, Ubuntu), Windows, Tomcat, RAID, Site-to-Site VPN, SFTP, high availability, root cause analysis
Tools	Jira, Confluence, Slack

PROFESSIONAL EXPERIENCE

DevOps & NOC Engineer | Eltropy — May 2021 – May 2025

- **Compliance:** Owned the SOC2 programme end to end: audit cycles, evidence collection and control mappings in Vanta, keeping the company continuously audit-ready.
- **Security:** Led vulnerability management with AWS Inspector (triage, controlled patching, validation, safe promotion to production); enforced secure AWS baselines and least-privilege IAM.
- **Kubernetes:** Migrated applications from EC2 to Amazon EKS; configured namespaces, HPA, Ingress and Helm charts for standard deployments and fast rollbacks, improving scalability and resource use.
- **CI/CD & releases:** Improved pipelines with Jenkins, Argo CD and GitHub Actions to raise release reliability and shorten cycles; ran end-to-end releases with QE, Dev, Engineering and Analytics using deployment checklists and strict testing.
- **Infrastructure as Code:** Used Terraform to deploy Site-to-Site VPN tunnels, working with customer firewall teams; also managed SFTP, SSO and SSL/TLS certificates (AWS ACM, DNS validation).
- **Monitoring & incidents:** Built CloudWatch alarms integrated with Step Functions, SNS, Lambda and Slack; resolved 5xx errors, Kibana uptime issues, token refresh failures and analytics DB outages, documenting fixes as SOPs.
- **Cost optimisation:** Automated production RDS start/stop scheduling; introduced resource tagging for cost attribution; applied S3 lifecycle policies (retention-based deletion and Glacier archiving); decommissioned orphaned EC2 instances in QA and Dev accounts.
- **Linux & data pipelines:** Hardened and patched Linux EC2 hosts (users, systemd, log rotation); supported data engineering workflows on Lambda, Glue and Step Functions.

DevOps / Infrastructure Engineer | Hewlett Packard Enterprise — Jan 2018 – May 2021

- Deployed and managed Linux, Windows and virtualised infrastructure for business-critical enterprise workloads, ensuring availability, performance and reliability.
- Automated infrastructure deployment and management tasks, reducing manual effort and standardising builds.
- Performed root cause analysis on infrastructure incidents and implemented preventive actions to improve reliability.
- Monitored system health, utilisation and capacity; designed RAID-based storage for data integrity and redundancy.
- Validated changes through testing and controlled deployments; followed security and access-control practices to support compliance.

IT Analyst | STS Infotechnologies (vendor for Cisco) — Jul 2015 – Jan 2016

- Supported Cisco employees with Webex, Jabber and mobility tools; troubleshot remotely and documented standard resolutions.
- Configured Cisco mobility and networking solutions for enterprise users.

CERTIFICATIONS & TRAINING

- **AWS Certified Solutions Architect – Associate**
- DevSecOps Essentials | DevOps Essentials | Git Complete
- Complete Python Bootcamp | Complete Guide to Elasticsearch | Data Visualization with Kibana

EDUCATION

B.E., Electronics & Communication – Visvesvaraya Technological University (VTU), India

PERSONAL DETAILS

Nationality	Indian
Visa status	Visit visa (valid until 8 December 2026)
Availability	Available to join immediately. Based in Dubai, open to in-person interviews.
Languages	English, Hindi, Urdu
